SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	04/10/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Art Unit: 2161

DETAILED ACTION

1. This Office action is responsive to the following communication: Amendment filed on 24 January 2007.
2. Claims 1-9 and 21-23 are pending and present for examination. Claims 1 and 21 are independent.

Response to Amendment

3. No claims have been amended.
4. No claims have been cancelled.
5. No claims have been added.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. **Claims 1-5, 7 and 21-23** are rejected under 35 U.S.C. 102(b) as being anticipated by Lakritz (U.S. Patent No. 6,526,426, hereinafter referred to as LAKRTIZ), filed on 28 January 1999 and issued on 25 February 2003.

8. **As per independent claims 1 and 21**, LAKRITZ teaches:

A method for crawling for resources in a network, the method comprising:

receiving a list of resources on the network and for at least one of the resources on the list of resources,

sending a first request to a server in the network for the resource using a first browser state {See LAKRTIZ, C3:L61-67, wherein this reads over "the Visitor module . . .

Art Unit: 2161

automatically determines the language and country of a Web site visitor and directs the Web server to deliver the appropriate localized content contained in one or more country/language databases and/or file-based content in a file system 204 to the visitor's browser"}, and

sending a second request for the same resource using a second browser state {See LAKRITZ, C3:L61-67, wherein this reads over "the Visitor module . . . automatically determines the language and country of a Web site visitor and directs the Web server to deliver the appropriate localized content contained in one or more country/language databases and/or file-based content in a file system 204 to the visitor's browser"}.

Additionally, it would be inherent that a list of resources would be received on the network since a user would select a resource from the aforementioned list to request the resource in a certain browser state.

9. As per dependent claims 2 and 22, LAKRITZ teaches:

The method of claim 1 wherein the resources are identified by uniform resource locators and wherein the first and second request specify a same uniform resource locator {See LAKRITZ, C5:L53-62, wherein this reads over "[i]f a document in the language that is first on the priority list is not present on the server, it then looks for the next most appropriate language"; C6:L11-13, wherein this reads over "This allows easy access to the appropriate translation for the informational text based on the most recently valid language for the visitor's country and language"; and C6:L29-30, wherein this reads over "a multi-user server can have a separate region definition for each user's site"}.

10. As per dependent claims 3 and 23, LAKRITZ teaches:

The method of claim 1 wherein the browser state comprises a language preference {See LAKRITZ, C3:L58-60, wherein this reads over "Web site visitors will immediately understand the information they see when they enter a site because it will be instantly presented in their language and for their country"; and C4:L28-38, wherein this reads over "the Visitor module determines the Web site visitor's language and country 301 from one or more of the following criteria"}.

11. As per dependent claims 4 and 23, LAKRITZ teaches:

The method of claim 1 wherein the browser state comprises a locale preference {See LAKRITZ, C22:L35-40, wherein this reads over "WebPlexer has the unique ability to independently maintain both the country and the language associated with each request. This provides a great deal of flexibility in selectively targeting content to specific regions or countries of the world"}.

12. As per dependent claims 5 and 23, LAKRITZ teaches:

The method of claim 1 wherein the browser state comprises location information {See LAKRITZ, C3:L58-60, wherein this reads over "Web site visitors will immediately understand the information they see when they enter a site because it will be instantly presented in their language and for their country"; and C4:L28-38, wherein this reads over "the Visitor module determines the Web site visitor's language and country 301 from one or more of the following criteria"}.

13. As per dependent claims 7 and 23, LAKRITZ teaches:

The method of claim 1 wherein the browser state comprises a network address {See LAKRITZ, C20:L46-48, wherein this reads over "WebPlexer provides a method of optionally forcing the selection of specific language(s) for certain hostnames or ip addresses"}.

Art Unit: 2161

Claim Rejections - 35 USC § 103

14. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

15. **Claims 6, 8-9 and 23** are rejected under 35 U.S.C. 103(a) as being unpatentable over LAKRTIZ, in view of Official Notice.

16. **As per dependent claims 6 and 23**, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include a browser identification within the request for a resource so that the server may appropriately deliver the correct content according to the browser type (e.g. Internet Explorer, Netscape Navigator, or Mozilla Firefox) and/or the browser version (e.g. Internet Explorer v.5.1. or v.9.10.4.87).

17. **As per dependent claim 8**, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have the first and second requests issued by two different crawler applications, both capable of having multiple browser states.

18. **As per dependent claim 9**, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have the first and second requests issued by a crawler application that can vary its browser state between the first and second requests since a user would be able to change the browser settings between the first and second requests.

Response to Arguments

19. Applicant's arguments filed 24 January 2007 have been fully considered but they are not persuasive.

20. Regarding the claim rejections under 35 U.S.C. 102, Applicant asserts the argument that "Lakritz does not show a method for crawling for resources in a network." The Examiner respectfully disagrees in

Art Unit: 2161

that Lakritz a translation management system which translates multilingual Internet Web sites for a user in response to a search query {See Larkritz, C1:L30-44 and C2:L1-43}. That is, the invention as disclosed by Lakritz is specifically for use in the document translation for multilingual Internet Web sites which have been requested and return by a search engine. Furthermore, Applicant asserts the argument that Lakritz fails to show "receiving a list of resource on the network." It is once again noted that it is both inherent and obvious to one of ordinary skill in the art that wherein a search is conducted by a user on a search engine, said search engine would return a list of resources matching said query to the user.

Additionally, in response to applicant's arguments, the recitation "[a] method for crawling for resources in a network" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hira*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

21. Regarding the claim rejections under 35 U.S.C. 103, Applicant asserts the argument that Lakritz fails to disclose that the "system can handle multiple different web sites and enable the effective indexing of different languages for the same content across multiple sites" (See Amendment, page 4). It is noted that the features upon which applicant relies (i.e., system can handle multiple different web sites and enable the effective indexing of different languages for the same content across multiple sites) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

22. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2161

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

23. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Kim whose telephone number is (571) 272-2737. The examiner can normally be reached on M-F, 9am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Apu Mofiz can be reached on (571) 272-4080. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
